

# SELF-EDUCATING MONITOR NOZZLES

## Style 883

- Durable, lightweight alloy construction.
- Master stream nozzle with an inbuilt educator.
- Transform a water monitor into a foam station without additional equipment.
- Designed for use with Class A and B foam, including AFFF and fluoroprotein .
- Configurable foam proportioning with pre-set options.
- Combination of straight stream and variable fog patterns.
- Interchangeable foam orifice inserts enable variable foam proportioning.
- Metering capacity of 3% or 6% for 225 GPM.
- 9' industrial grade pickup hose with quick connection coupling and 15" stainless steel tube.
- Optional drum pickup kit comes with 1m rigid PVC tube with shutoff capability and 9' pickup hose.

Optional Drum Pickup Kit

## Specification

Style	Material	Flow @100 PSI (7 bar)	Water Inlet	Foam Inlet	Proportioning	Length	Weight Lbs(kg)
883	Alloy	225 GPM (850 LPM)	1-1/2" or 2-1/2" (38mm or 65mm)	Quick Connection	3%, 6%	6.3" (160mm)	6.6 (3kg)
